

Q200

Production cubed!

It's the perfect growing cube—designed for dedicated professional growers, 200 centimetres wide, long and high. These formidable proportions provide the ideal home for up to four 600-watt HID grow lights—perfect to illuminate the four square meters of grow space. Of course, all that lighting inside the PAR+ optimised interior makes for a pretty intense growing environment, so thankfully the HOMEbox® Ambient Q200 boasts a generous array of ventilation ports including twin 250mm (10") air-ports on each side for independent air-cooled reflector ventilation. This affords professional growers the ability to optimise garden temperatures without stripping too much relative humidity through over-ventilating the garden itself.

Additional side access, four 300 mm (12") roof ventilation ports and six OmniFlow directable air vents give the professional grower all the tools needed in order to create and maintain the most nproductive and rewarding indoor garden imaginable.

Assembled size: 200 x 200 x 200 cm

Grow space: 4 m²

- High-tech German design and engineering
- Rugged, plant-safe materials ensures long working life
- Removable, water-resistant flooring
- Solid base attached to the tent with a zip all the way around
- Double side access
- Inlet and outlet tubes:
 - + 100 mm (4"): 1x right, 1x left, 2x Roof, 2x Back
 - + 200 mm (8"): 1x right, 1x left
 - + 250 mm (10"): 2x right, 2x left
 - + 300 mm (12"): 2x Roof
- 6 x 250mm (10") OmniFlow-Airvents 2x Back, 2x left and 2x right
- 700-micron MicroMesh bug-screen
- Tough canvas outer shell
- PAR+ super reflective lining promotes faster growth and higher yields
- Super strong 22mm diameter tent poles—stronger plastic corners
- Once closed, unit is entirely sealed and virtually lightproof
- Total-Blackout Zippers - no need for Velcro flaps
- Maximum Capacity: 150 kg
