

hydroMAX

grow schedule

Stage	Growth		Bloom									
Week	-1	-2	1	2	3	4	5	6	7	8	9	
Hydro MAX grow A	1-2ml/l	3-4ml/l										Flush with water
Hydro MAX grow B	1-2ml/l	3-4ml/l										
Hydro MAX bloom A						3-4ml/l						
Hydro MAX bloom B						3-4ml/l						
Silicon MAX					1ml/l							
RootStim*	1ml/l				0.5ml/l							
Fulvic*						2ml/l						
Buddy						0.5ml/l		1ml/l				
Finale										3-4ml/l		

*In a recirculating hydroponic system only add to fresh solution mixes.

Please note: the final solution PH should be between 5.8-6.5.
For longer growth cycles, repeat Growth Week -2. For longer flowering cycles, repeat Bloom Week 4.

VITALINK

This is a straightforward grow schedule designed for new/intermediate growers, not all of our products are included in the chart. Advanced grow schedules are available which cover the rest of our range, please visit our website for more information on those!
